Dear Charlie:

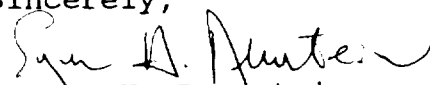

We are sending to you, Jerry Willman and Stuart Hersh our plan for additional work to further delineate the NAPL contamination at the Lenz Oil Site. This workplan is based on the draft provided to you on March 17, which has been revised in accordance with our various discussions since that time. The workplan is in the form of an addendum to the Lenz Oil Field Sampling Plan. We are prepared to recommend that the Settling Respondents undertake the work described once the agencies have indicated their approval of the workplan. Please advise us, either by phone or in writing, by the close of business on Thursday, April 28, regarding the response of the agencies to this proposal. Meanwhile, please feel free to call John Imse or Elsie Milano at ERM (708/940-7200) or me if you have any questions concerning the workplan.

Again I must note that this workplan is submitted in an attempt to satisfy the desire of the agencies for certain additional data. Because the proposal is being submitted for settlement purposes, it is not admissible evidence. Submission of the proposal is not an admission by the Settling Respondents that the additional information is necessary or required under the RI/FS Workplan or to produce a final FS. We offer the workplan in a spirit of cooperation and in an effort to resolve outstanding issues regarding Site information.

We eagerly await your response to this workplan.

Sincerely,

Eugene H. Bernstein
